

LAVATEC
Laundry Technology Inc.

**STRENGTHENED
FOR LONG-LASTING
RELIABILITY**

WHY LAVATEC LAUNDRY TECHNOLOGY?

Lavatec Laundry Technology has established itself in the commercial laundry field with a reputation for delivering dependable machines engineered for higher returns throughout their lifecycles. This dependability stems from an insistence on using the strongest and best materials, expertly crafted and controlled with the type of programming that brings versatility, ease of use and diagnostic capabilities to every application. Especially noteworthy of LLT machinery is the kind of engineering that strives for simplicity. Critical parts are easily accessible for maintenance with many designs structured to allow retrofitting down the road.

As a major manufacturer of continuous tunnel washers, LLT is a rare company that offers centre transfer, bottom transfer and double-drum construction options. The company is also known for its heavy-duty washer extractors, extraction presses, centrifuges, dryers, conveyor systems, feeders, ironers and folders.

Based out of Heilbronn, Germany, Lavatec Laundry Technology is a true global player with equipment in use throughout Europe, the Far East, Africa, South America and North America. In the United States alone the company has over 6,000 machines in place.

RECOMMENDED FOR: All Healthcare, high linen output facilities, linen rental etc

ENGINEERED FOR A HIGHER RETURN

CONVEYORS

- Monorail systems for soiled and clean work
- Step-loading conveyors
- Lift and traverse shuttles
- Suction systems
- All variations of discharge, transport and sorting conveyors

LT-SERIES CONTINUOUS TUNNEL WASHERS

- Bottom transfer, center transfer, single-drum and double-drum options
- Every double drum can be fitted for heating, draining, chemical injection, temperature and pH monitoring

- Touch-screen controls for up to 114 wash programs with diagnostics
- Low-maintenance four powered friction drives
- Incorporated water recovery and re-use system

Available in five to 20 chambers from 55- to 220-pound capacities

LX-SERIES WASHER EXTRACTORS

- Minimal footprint with near-silent operation
- Touch-screen programming with diagnostic feedback
- Central computer accessible process control
- Lowest energy at any speed with single-motor inverter controlled drive
- Optional automatic systems available

Pass-through models from 80- to 530-pounds; front-loader models from 250- to 600-pounds

LP-SERIES WATER EXTRACTION PRESSES

- Programming from one to 60 bars
- Guidance system prevents head and basket damage
- Modifiable discharge direction
- Special compounds for friction and abrasion resistance
- Touch-screen controls with diagnostics

Models available from 55- to 220-pounds ranging from 30 to 60 bar extract pressure

TT-SERIES DRYERS

- Low-maintenance cylinder door operation
- Air-assisted unloading or tilt discharge options
- Unique heat/burner system extends entire depth of drum for thorough, even drying
- Multi-phase temperature control with infrared monitoring system for energy reduction
- Touch-screen controls with diagnostics

Available with steam or gas heat from 140- to 600-pound capacities

“You want to find the best return for every dollar you spend. I found that Lavatec can be counted on to give you a quality product at a fair price, and maintain that equipment with a good backup group.”
